

Les opérations à 3 chiffres

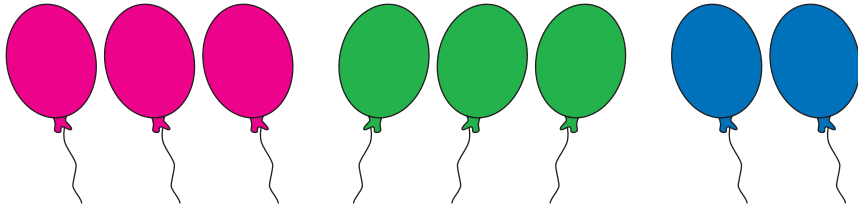

1. Compte ensemble les différents groupes :

$$2 + 3 + 4 = 9$$

$$1 + 4 + 3 = 8$$

$$3 + 3 + 2 = 8$$

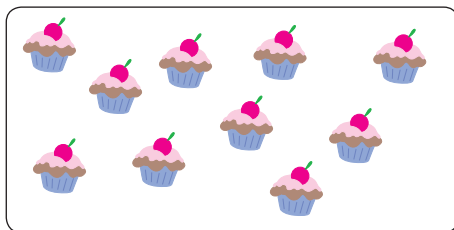

$$2 + 5 + 1 = 8$$

$$2 + 2 + 3 = 7$$

2. Echange la place des chiffres, afin d'obtenir à chaque fois le résultat demandé :

$$10 = 2 + 3 + 5$$

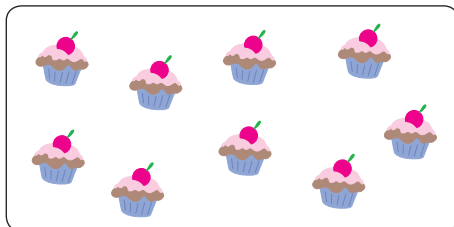

$$10 = 1 + 2 + 7$$

$$10 = 3 + 4 + 3$$

$$10 = 6 + 2 + 2$$

$$10 = 4 + 5 + 1$$

$$10 = 3 + 1 + 6$$

$$9 = 2 + 3 + 4$$

$$9 = 1 + 2 + 6$$

$$9 = 3 + 4 + 2$$

$$9 = 6 + 2 + 1$$

$$9 = 4 + 4 + 1$$

$$9 = 3 + 1 + 5$$

$$8 = 2 + 3 + 3$$

$$8 = 1 + 2 + 5$$

$$8 = 3 + 4 + 1$$

$$8 = 6 + 1 + 1$$

$$8 = 4 + 3 + 1$$

$$8 = 3 + 1 + 4$$
