

## Minusrechnen im Zahlenraum bis 6

### 1. Wieviel bleibt übrig?

$6 - 2 = \underline{4}$

$6 - 3 = \underline{3}$

$6 - 5 = \underline{1}$

$6 - 1 = \underline{5}$

$6 - 4 = \underline{2}$

$5 - 3 = \underline{2}$

$5 - 1 = \underline{4}$

$5 - 4 = \underline{1}$

$5 - 2 = \underline{3}$

$5 - 0 = \underline{5}$

$4 - 4 = \underline{0}$

$4 - 1 = \underline{3}$

$4 - 3 = \underline{1}$

$4 - 0 = \underline{4}$

$4 - 1 = \underline{3}$

### 2. Umkehraufgaben:

Rechne zuerst die Addition und dann die Subtraktion. Fällt dir dabei etwas auf?

$4 + 2 = \underline{6}$

$3 + 3 = \underline{6}$

$1 + 5 = \underline{6}$

$2 + 4 = \underline{6}$

$6 - 2 = \underline{4}$

$6 - 3 = \underline{3}$

$6 - 5 = \underline{1}$

$6 - 4 = \underline{2}$

$2 + 3 = \underline{5}$

$4 + 1 = \underline{5}$

$3 + 2 = \underline{5}$

$1 + 4 = \underline{5}$

$5 - 3 = \underline{2}$

$5 - 1 = \underline{4}$

$5 - 2 = \underline{3}$

$5 - 4 = \underline{1}$

$2 + 2 = \underline{4}$

$3 + 1 = \underline{4}$

$0 + 4 = \underline{4}$

$1 + 3 = \underline{4}$

$4 - 2 = \underline{2}$

$4 - 1 = \underline{3}$

$4 - 0 = \underline{4}$

$4 - 1 = \underline{3}$

$5 + 1 = \underline{6}$

$0 + 6 = \underline{6}$

$5 + 0 = \underline{5}$

$1 + 2 = \underline{3}$

$6 - 1 = \underline{5}$

$6 - 0 = \underline{6}$

$5 - 0 = \underline{5}$

$3 - 2 = \underline{1}$
